**All About OLLI**

**Who We Are**

The Osher Lifelong Learning Institute (OLLI) at George Mason University offers daytime courses, lectures, special events, and other activities during eight-week terms in the spring and fall, a four-week winter term, and a six-week summer program. There are no exams, no credits, no college degree required or offered, and no age threshold. Course leaders are qualified members of OLLI, George Mason University faculty, and others who enjoy sharing their knowledge. OLLI is particularly proud of its volunteer teachers and speakers, many of whom are well-known experts in their fields. The views expressed are those of the instructor and do not reflect the official policy or position of OLLI or George Mason University.

Members pay annual dues, which entitle them to attend as many activities as they wish, subject to space availability. There may be charges for materials and for some special events.

OLLI publishes an email newsletter (OLLI E-News), a catalog each term, an online membership directory, and the Member Handbook. An annual literary journal, OLLI Ink, and, from time to time, the Poets of OLLI collection are also published.

OLLI is one of many Osher Lifelong Learning Institutes affiliated with The Bernard Osher Foundation and is also a member of the Road Scholar Institute Network. OLLI is a nonprofit, equal-opportunity 501(c)(3) organization and does not discriminate on the basis of race, color, or national/ethnic origin.

100 Art and Music

F101 More than a Snapshot
Mondays, 9:40–11:05, Sept. 21–Nov. 9
Instructor: Dan Feighery
Class limit: 35
This course will help you make photographs that are more than ordinary. As opposed to discussing features of a particular camera, our emphasis will be on what is in the picture space and using your camera to record and interpret what you see. While the instructor typically uses a DSLR type camera, any camera you have is fine as long as you are familiar with its features. Each week we will complete a shooting assignment, bring a jpg photo from that assignment to discuss, and, as a group, offer some constructive comments. Assignments will include still life, nature, documentary, photojournalism, macro/ close-up, and other areas of interest to attendees.
Dan Feighery is a retired Air Force officer who has attended photography courses at Northern Virginia Community College and George Mason. He founded the OLLI Photography Club and has taught OLLI photography classes.

F102 Understanding Opera (Part 1)
Four sessions
Instructor: Glenn Winters
This course offers a critical survey of the productions comprising the first half of Virginia Opera's 2015-2016 season. Works discussed include Offenbach's zany, satirical comedy Orpheus in the Underworld and Puccini's beloved romantic classic, La Bohème. Audio and video excerpts will be used to analyze musical and dramatic aspects of these operas. This course is recommended for beginners and aficionados alike.
Glenn Winters has been Virginia Opera's community outreach musical director since 2004. His adult education program "Operation Opera" reaches thousands of Virginians each season. He is the author of The Opera Zoo: Singers, Composers and Other Primates. His commissioned operas include The Empress and the Nightingale, The Princess and the Pea, A Trickster's Trilogy and Deep River: Marian Anderson's Journey. Winters has an DM degree in piano from Northwestern University.

F103 Music Sampler
Tuesdays, 9:30–10:55, Sept. 22–Nov. 10
Note time
Fairfax Lord of Life
Coordinators: Kathleen Meyer, Kathryn Hearden
Kathleen Meyer, with Kathryn Hearden from the George Mason School of Music, will coordinate this course highlighting examples of the musical talent that abounds at George Mason. Each week knowledgeable and enthusiastic professors from the George Mason School of Music, often accompanied by their most promising students, will generously share their musical gifts with us in presentations that are varied, lively, informative, and entertaining.

F104 Fred Astaire, Entertainer Extraordinaire
Tuesdays, 1:45–3:45, Sept. 22–Nov. 10
Note time
Instructor: Marianne Metz
Choreographer Jerome Robbins was asked by an interviewer, "Which dancers do you think are the greatest, and which dancers influenced you the most?" Robbins replied unhesitatingly, "Oh, well, Fred Astaire." The reporter looked shocked. Robbins asked what was wrong. The reporter said, "Well, Mr. Balanchine just said the same thing." In fact, it was a view widely held. Fred Astaire undoubtedly was one of the greatest and most influential dancers ever to perform. He also excelled at acting, singing, songwriting, and playing a variety of musical instruments. In this class we'll be delightfully reminded of the many talents of this remarkable entertainer. We'll see eight of his films in their entirety, including three with Ginger Rogers, and five with such co-stars...
as Rita Hayworth, Bing Crosby, Judy Garland, Cyd Charisse, Joan Leslie, Red Skelton, and Audrey Hepburn. As time allows, we’ll discuss Astaire’s extraordinary life and career, as well as the individual films. This class was previously given in Loudoun and now, by popular demand, comes to Tallwood.
In previous OLLI classes, Marianne Metz has shared her enthusiasm for Gene Kelly, Frank Sinatra, Alice Faye, and classic American songwriters. She is co-chair of the Art/Music Program Planning Group.

F105 Drawing and Sketching Workshop
Tuesdays, 2:15–3:40, Sept. 22–Nov. 10
Facilitators: Jonathan Korin, Therese Pung, Bill Parsons
Class Limit: 14
Participants with some drawing experience will explore techniques, materials, and ideas in drawing and sketching. Newcomers will receive individual assistance as needed. While some direction and instruction will be given, participants will be encouraged to exercise creativity and apply their own personal interests to produce work that is uniquely theirs, using whatever medium suits their drawing. Topics will include student suggestions from the Spring 2015 workshop such as: figure drawing, portraiture, explorations of color in drawing, perspective, and others. Projects will be started in class but usually finished outside of class. To help participants grow, there will be weekly class discussions of finished work.

Once again OLLI’s choral group, singing in chorus and ensembles, will emphasize popular music, Broadway show tunes, and classic American songbook music. A great voice is not required, just a desire to sing for fun. There is no need to read music or even to have ever sung before. Gayle Parsons will accompany the singers on the piano.
Palmer McGrew, an OLLI member, has been a longtime performer in this course and a substitute instructor/director for the class. He sings in the West Point Alumni Glee Club, in barbershop harmony with the Fairfax Jubil-Aires, and with the Greenspring Village Choristers. He also co-directs the Choristers.

- Oct. 27 and Nov. 3: We will look at the 2008 recession, and the government policies encouraging homeownership. This resulted in excesses culminating in the collapse of housing values, millions of foreclosures, and an economic recession. We will also look at the savings and loan crisis in the 1980s, and compare it to the 2008 crisis.  
- Nov. 10: How has the banking industry changed, and what is the impact of Dodd-Frank, the legislation created in response to the 2008 recession? Al Smuzynski and Kevin O’Connell are retired savings and loan regulators who were heavily involved with the savings and loan crisis in the 1980s. Al has been an OLLI member since 2007, and moderator of the Tom Crooker Investment Forum. Al and Kevin have previously taught OLLI courses on banking issues.

L209  Understanding Economics
Thursdays, 11:50–1:15, Oct. 22–Nov. 12
Four sessions
Instructor: Stephen Canner
This course is designed for people who never took economics in college or who did but never quite got it. We will cover topics such as how markets set prices, why markets are not always right in setting prices, why nations trade and invest, as well as factors that drive economic growth and job creation. There will be recommended outside readings to complement the class discussion.
Stephen Canner has a PhD in economics, and served 28 years in the Department of the Treasury, International Affairs, and 18 years at the US Council for International Business.

F301 Russia and the “Lands Between”
Mondays, 11:50–1:15, Sept. 21–Nov. 9
Instructor: Bernie Oppel
Modern Russia owes as much to its traditional institutions and cultures as to the Soviet regime of the 20th century. The Central European “lands between” have demonstrated a remarkable capacity for survival in the face of constant and often corrosive outside pressures. In the 19th and 20th centuries, traditional regimes and societies of Russia and Central Europe experienced rapid and dynamic change brought about by new forces of nationalism, industrialization, urbanization, democracy, and socialism. This course examines and analyzes the restraints imposed on traditional Russian institutions by modern and external forces, as well as the interaction and response of Central European peoples to these forces and to the successive regimes of major powers in the area. The course incorporates class discussion in a lecture format.
Bernie Oppel, OLLI member, is a retired Foreign Service Officer and retired Air Force colonel. He holds a PhD in modern European/Russian history from Duke University. He has taught history at the USAF Academy, as well as several history and history film courses at OLLI.

F302 The Age of American Imperialism
Mondays, 2:15–3:40, Sept. 21–Nov. 9
Instructor: Patrick McGinty
From the end of the Civil War until the 1880s, the indifference of most Americans to the outside world was almost unbelievable. But then, in the sunset decades of the nineteenth century, a momentous shift occurred in US foreign policy. In a few short years the US had fought the Spanish American War; acquired Hawaii, Puerto Rico, Guam and the Philippines; joined other nations in suppressing the Boxers in China; crushed an insurrection in the Philippines; and built the Panama Canal. In 1916 as the country teetered on entering the World War, the US had intervened in Mexico, Cuba (twice), Nicaragua (twice) and Haiti. Come join us as we review these historical events and examine the political, social, economic, and psychological factors responsible for causing this dramatic shift in the national attitude.
Patrick McGinty, an OLLI member, is a retired naval officer with an MA and PhD in history from Georgetown University. He has taught various history courses at University of Maryland University College.

F303 The British Side of the American Revolution
Tuesdays, 9:40–11:05, Sept. 22–Oct. 13
Four sessions
Instructor: Beth Lambert
There are two sides to every story, but have we ever looked at the American Revolution from the other side? Have we ever questioned the motives of the American patriots, as well as King George and Parliament? Have we ever wondered why at least a third of the colonists remained loyal to the Crown? Are we aware that a significant number of slaves and Native Americans fought on the side of the British—and had good reasons for doing so? In these four sessions we will view the American Revolution from the other side of the pond.
Beth Lambert is a retired professor of English at Gettysburg College, where she taught courses on all aspects of the 18th century. Her biography of Edmund Burke was published by the University of Delaware Press.

F304 Winston Spencer Churchill: Faithful But Unfortunate
Tuesdays, 9:40–11:05, Oct. 20–Nov. 10
Four sessions
Instructor: Doug Hottel
Winston Spencer Churchill (1874-1965) was a controversial figure long before he became Britain’s WW2 Prime Minister. His life was one of extremes, including periods of public adoration and also universal condemnation. Descended from the Duke of Marlborough, he was a troubled student, widely-read correspondent, adventure-seeking soldier, prolific author, and politician. As such he was appointed to a
History

broad spectrum of government positions with unpredictable results. This four-part course will review, from many different sources, the ups and downs of his tumultuous life before 1940. Hang onto your seats as we examine the man who was called "the last Victorian."

Douglas W. Hottel has been an OLLI member since 2010 and this is the sixth course he has taught. Douglas received a BA in history/political science from Bethany College, an MA in international affairs from the Catholic University of America, and an MA in national security and strategic studies from the US Naval War College.

F305 The Silk Road: Golden Journey
Tuesdays, 11:50–1:15, Oct. 20–Nov. 10
Four sessions
Instructor: Robert Springer
Class limit: 45
The Silk Road is a historic system of overland trade routes linking the Orient and Europe for 1,500 years. Opening during the Han Dynasty in China and the Roman Era in Europe, it provided the primary contact between the East and the West. It is the route traveled by merchants, explorers, priests, monks, missionaries, soldiers, adventurers, scholars, and all manner of humanity such as Marco Polo, Alexander the Great, Genghis Khan, Rudyard Kipling, and Winston Churchill. The great camel caravans brought valuable cargo such as silk, spices and jewels, as well as ideas, inventions and religions that changed the world. The course will begin with a general overview of the Silk Road, followed by discussions of a number of special topics related to China, Central Asia, and the Middle Eastern Countries which the route passed through. These include:
- Syria, Lebanon, Jordan: Traveling ancient routes, today and yesterday, including Petra. Time permitting, we also will discuss damage to the sites in the current conflicts.
- The “Great Game,” the 19th Century contest between Russia and Great Britain for the control of central Asia.
- Greek, Buddhist, and other art along the Silk Road.

Robert Springer, Professor Emeritus American University. After an Army career, he joined the faculty and was a teacher and department chairman for many years. He earlier taught in programs for Loyola University and the Universities of Hawaii and Utah. Later, he was a consultant and program director at the Institute for Defense Analysis.

F306 Galileo’s Telescope: Science, Politics, and Religion in the Early Modern Period
Tuesdays, 2:15–3:40, Sept. 22–Nov. 10
Instructor: Nick Timreck
The scientific revolution was one of the most significant events in the early modern period. Indeed, some historians of science claim it was the single most transformative moment in the history of science. Other historians refute this assumption. This course will examine the origins of modern science and the ways in which science, politics, and religion intersected to shape Western culture. This will be a lecture style course with no assigned readings, but hopefully, it will provide an engaging and thought provoking opportunity for discussion.

Nick Timreck is an OLLI instructor and an academic assistant in the Department of Intercollegiate Athletics at George Mason University. He holds an MA in US history from George Mason.

F307 Travelogue on Virginia
Wednesdays, 9:40–11:05, Oct. 21–Nov. 11
Four sessions
Instructor: Ken Plum
Take a classroom visit to all regions of Virginia with the longest currently serving member of the House of Delegates and native of the Commonwealth, Delegate Ken Plum. He will suggest places to visit, provide some history, and narrate folk tales. He will also describe local cultures and give a calendar of year-round events. Whatever your interests, you can pursue them in Virginia with Ken’s help. Classroom lectures, discussion, and travel materials will be included.

Delegate Ken Plum is one of the founders of OLLI and a popular leader of courses on Virginia’s history and government. He is a native Virginian who holds degrees from Old Dominion University and the University of Virginia. His weekly commentary appears in a local newspaper, and in his electronic newsletter, Virginia E-News.

F308 A History of American Politics
Thursdays, 9:40–11:05, Sept. 24–Nov. 12
Instructor: William Reader
This course will discuss the emergence of political factions among governing elites in America, the attitudes of the founding fathers toward “factions” and political parties, why a two-party system rather than a multi-party system emerged in America, the factors that led to the emergence (and decline) of specific parties, and the history of American political parties from the American Revolution to the present.
Interwoven with these basic issues are questions as to how the Constitution, electoral laws, political philosophies, policy differences, immigration, social class, religion, ethnicity, racial and ethnic conflict, political machines, historical events, political personalities, and technological innovations affected American politics. Discussions will also include the role and impact on American elections of mudslinging, political cartoons, political commercials, and attack ads.

William Reader has a PhD in American social history from the University of Massachusetts. He retired in 2008 after 37 years with the federal government and has since taught OLLI courses on The History of Media, American Social and Cultural History, How a Few Simple Things Changed History, and America between the World Wars.

F309 Irish History: Fintan the Wise to Fianna Fáil

Thursdays, 11:50–1:15, Sept. 24–Nov. 12
Instructor: Kevin Barry Deasy

Included in the Irish Diaspora are some 30 to 40 million Americans—and many OLLI members. If you wonder what your restless ancestors were up to before they left the Auld Sod, this broad survey of Irish history covers 10,000 years, from pre-Celtic artifacts and ancient legends to the founding of the Irish Free State. In between, you’ll find Fomorians, Gaels, Vikings, Monks, Galloglasses, Saxons, Normans, Spaniards, Frenchmen, High Kings, English Kings, invasions, battles, Plantations, risings, spies, informers, Unionists, Republicans, Black-and Tans, the Anglo-Irish War of Independence, and a nasty Civil War.

OLLI member Kevin Barry Deasy hails from a long line of Irish rebels (and is named for one who got caught and hanged). Nevertheless, he cautions that neither the Loyalist narrative nor the Republican narrative can, by themselves, convey the whole truth of Ireland’s turbulent history. A retired US Army officer, Kevin holds a BS in electrical engineering from Northeastern University, and MS degrees in computer science and business management from George Washington University. He has worked as an engineer and manager at several government contracting firms around the Washington beltway, most recently at Northrop Grumman.

F310 “The World Will Hold its Breath:” The War Against Hitler and Mussolini

Fairfax Lord of Life
Coordinators: Brad Berger, Emmett Fenlon

The year 2015 marks the 70th anniversary of the end of the Second World War. This defining epoch of the twentieth century casts a long shadow, culminating in a huge cost: fifty million lives lost and many more scarred by its effects. The aggression of Adolf Hitler and his ally Benito Mussolini caused the formation of an alliance of erstwhile friends and sometimes enemies to beat back the Fascist onslaught. Only a generation called the Greatest could be called upon to accomplish herculean efforts on both the home front and battlefront to support the Allied cause. National Park Service rangers have participated with OLLI in over 80 thematic courses, special events and trips since 2001.

R311 The American West

Mondays, 2:15–3:40, Oct. 19–Nov. 9
Four sessions
Instructor: Richard Stillson

The past and present of the American West have captured the imagination of people throughout the world like no other region of the country. The cowboy herding cattle across dusty plains, the Indian fighting to maintain traditional lands and ancient cultures are but two iconic symbols of the West. But what is the West? Where does the West begin? Who are Westerners? How did this region acquire such an impact on the imagination, economy, society, and culture of the country? Focusing on the 19th and 20th centuries, this course explores the diverse geography, cultures, and economies of the region through its history. In addition to cowboys and Indians, we will examine how the environment, the federal government, agriculture, mining, movies, and the military influenced diversity, conflict, and change in the West. We will also look at both the historical record and fictional accounts through film and literature.

Richard Stillson has a PhD in economics from Stanford University. After a 25-year career at the International Monetary Fund, he retired to indulge his passion for history. He earned his PhD in history from The Johns Hopkins University and now teaches history at George Mason. Dr. Stillson is the author of Spreading the News: A History of Information in the California Gold Rush (University of Nebraska Press, 2006).

Rose Gallery at Reston Community Center, Lake Anne  
Note dates  
Coordinators: Brad Berger, Emmett Fenlon  
When one thinks of National Mall and Memorial Parks he or she generally pictures the towering Washington Monument and the grand spectacle of the Lincoln Memorial. However, there are many lesser known sites and memorials throughout the city that are the responsibility of the National Park Service. Sure to be eye opening, this course will unveil the artistic grandeur and symbolism of a handful of these places. In anticipation of the centennial of the National Park Service in 2016, please join us to celebrate the memorials that hide in plain sight. National Park Service rangers have participated with OLLI in over 80 thematic courses, special events and trips since 2001.

R314  Founding Fathers  
Thursdays, 9:40–11:05, Sept. 24–Nov. 12  
Instructor: Glenn Kamber  
The instructor will use a variety of media, including the award-winning HBO series, John Adams, to examine the political philosophies of the founding fathers and how the persistent struggle between advocates of small government and those who back large government has reverberated down through the nation’s history. Course participants will be asked to consider what might have happened to our people and our land if we had lost the Revolutionary War. Glenn Kamber is an OLLI member and instructor. He has taught a number of courses at Reston over the past four years that focus on current events, as well as political and social issues that affect our lives. He is a retired senior executive from the US Department of Health and Human Services where he managed policy and program development in the immediate office of eight HHS secretaries.

L315  Issues and Politics in the Civil War  
Mondays, 9:40–11:05, Sept. 21–Oct. 19  
Five sessions  
Instructor: Robert Finkelstein  
Many of the political, social, geographical, and economic differences that were considered causes of the Civil War were present prior to the ratification of the Constitution. This course will cover the history of the differences, the events between 1846 and 1860 that led to secession and war, the goals of the political and military leaders during the war, and the overall strategies of the Union and Confederacy. We will focus on the outcomes and consequences of selected battles that changed politics at the end of the war, but we will not describe and diagram the battles. Robert Finkelstein earned his BS in American government from Columbia University, and his MS in computer systems from American University. Over the past five years, he has extensively read about and studied the Civil War.

L316  The Serendipity of Life!  
Wednesday, 9:40–11:05, Sept. 30–Nov. 11  
Seven sessions  
Coordinator: Mark Weinstein  
The Serendipity of Life! Man plans and God laughs. Do you think back over your life and contemplate things such as the following: the assorted paths of fate and events which formed your life, your family and where you are now; decisions that you made, or decisions made by some unknown persons that had consequences in your life; the homeroom assignment mistake that resulted in your meeting your lifelong best friend; the reluctant blind date when you met your spouse; the random military assignment that sent you to Europe when everyone else was going to Vietnam; the business meeting scheduled for 9/11 that was moved at the last minute from the World Trade Center to an office in NJ to be able to get in a round of golf in the afternoon? We all have events in our lives affected by happenstance. Join with your OLLI community, as we share these life molding events. We will have two speakers per class to discuss the paths their lives took. Mark Weinstein, who has been thinking and chronicling his serendipity, will coordinate. He is an eight year OLLI member, has a BSEE, and has taught courses in aviation, American history, and computers.
L317 China in Retrospect
Wednesdays, 11:50–1:15, Sept. 23–Nov. 11
Instructor: Keith Young
This course will acquaint you with Chinese history from 1912 to 1949, with special emphasis on the period from the start of World War II until the fall of the Nationalist Chinese government in 1949. The focus of the course is on the role of the US Navy in China during WW II. Although the US Navy played a larger role, the focus of the course will be on the Navy. Among the issues examined will be the differences in approach and results of the two services, as well as the effect of the personalities of the participants on the course of events. As the war ended US forces witnessed much of the Chinese Civil War for control of mainland China. American foreign policy during the period had a significant effect on the outcome, and we will look at the result and examine several views on how China was finally lost to the Communists.
Keith Young, a retired naval officer with an interest in military history, lectures on many Civil War, and World War II topics.

Mondays, 11:50–1:15, Sept. 21–Nov. 9
Clifton Lord of Life
Coordinators: Michelle Blandburg, Pati Rainey, Thelma Weiner, Roberta Feldman
Class Limit: 28
OLLI’s Readers Theater is great fun for the “secret actor” in all of us! Scripts are usually monologues, short skits, and acts or scenes from longer plays. Parts may be handed out in advance or read cold. No memorization is required. We rehearse before RT or between other classes; rehearsal can also be by phone when necessary. Props or costumes are not required. Time between performances allows for kudos, comments, and suggestions from the audience. Even if you’ve tried RT before, come back. We are always trying new things!

F403 Henrik Ibsen's A Doll’s House
Tuesdays, 9:40–11:05, Sept. 22–Nov. 10
Instructor: Elisabeth Wolpert
Ibsen is known as the father of Modern Drama. For all its well-made features, A Doll’s House presents a compelling image of human beings confronted by crisis. The play makes Ibsen our contemporary through its hierarchy of interwoven themes of bourgeois marriage, women's equality, religion versus materialism, and dream versus reality. After analyzing the many tragic conflicts in the play, we will watch the film production and, if we have enough time, the film Hedda Gabler.
Elisabeth Wolpert was born and educated in France. Her doctoral thesis dealt with 16th century French literature. She enjoys being at OLLI where she has taught several courses.

F404 Memoir Writing
Tuesdays, 9:40–11:05, Sept. 22–Nov. 10
Instructor: Dianne Hennessy King
Class limit: 24
Learn to write about your individual and shared history in ways that will clarify your vision, whether you are looking into your past, documenting your present, or contemplating your future. Dianne Hennessy King is a cultural anthropologist, writing instructor, editor, and television producer. For many years she was the coordinator of the annual “Writing Your Personal History” symposium in Vienna and has helped plan the Virginia Writers Club symposium in Charlottesville for
three years. This will be her eleventh memoir class for OLLI. Dianne is co-authoring a book, *Memoir Your Way*, to be published in 2015.

**F405  Let’s Study a Play Together: *Almost, Maine***

Tuesdays, 11:50–1:15, Sept. 22–Sept. 29
Two sessions
Instructor: Doris Bloch
Class limit: 28
The objectives of this course are to read and discuss a play and to have fun doing it in a participatory group setting. Prior to each class meeting, we read the assigned act or roles independently, and during class we take turns reading the parts out loud. After the reading, we analyze the action and will also view video clips of several productions. All members of the class are encouraged to participate fully in readings and discussions. The chosen script is a contemporary play which concerns life, love, loss, friendships, and relationships. The action takes place in a small town in Maine, named Almost. Each scene involves a different set of players, yet they are somehow tied together, as one might expect within a closely knit community. The play runs a gamut of emotions, with some funny moments, some bittersweet scenes, and quite a few surprises. Registered class members will be contacted on how to obtain the script.

*Doris Bloch* is a co-chair of the Literature, Language and Theater Program Planning Group and has offered numerous play-reading classes at OLLI, covering dramas and playwrights ranging from *commedia dell’ arte* to George Bernard Shaw to Agatha Christie.

**F406  The Sonnets of William Shakespeare***

Tuesdays, 11:50–1:15, Oct. 6–Nov. 10
Six sessions
Instructor: Karen Miles
Class limit: 50
The 154 sonnets of Shakespeare constitute a set of personal reflections on issues that we still wrestle with in our own lives, including: the inevitability of death and physical decay, the treachery of people, the fickleness of fortune, the vanity of worldly achievements, the nature of true and false love, and the tension between our physical selves and our spiritual selves. And yet the sonnets distill these experiences and insights into rigidly structured poems of just fourteen lines using familiar images from nature and the everyday world. In order to appreciate the range and artistry of the sonnets, each session will focus on a small group of sonnets that share a related theme. The recommended text is the edition of the sonnets from the Folger Shakespeare Library, edited by Barbara Mowat and Paul Werstine.

*Karen Miles* holds a PhD from the University of Wisconsin, Madison, in French Literature. She taught at Marquette University and the University of Wisconsin-Parkside before becoming a Program Officer at the National Endowment for the Humanities. Since retiring, she has co-taught several courses at the Washington National Cathedral, including one on Shakespeare’s Sonnets.

*Mike McNamara*, an OLLI member, has been published in several literary journals and magazines and has received awards from the Poetry Society of Virginia. *Jan Bohall*, also an OLLI member, has had poems published in various periodicals and has won awards from the Poetry Society of Virginia.

**F408  A Tour of Hardy’s Wessex***

Wednesdays, 9:40–11:05, Sept. 30–Nov. 11
Seven sessions
Fairfax Lord of Life
Instructor: Kay Menchel
Thomas Hardy is one of England’s most beloved literary figures. His elegiac works chart the declining rural society of the late Victorian era. In this class we will sample three different expressions of Hardy’s art: short stories in the collection *Life’s Little Ironies*; a novel, *The Mayor of Casterbridge*; and some of Hardy’s poetry. The full text of *The Mayor of Casterbridge* and all the stories selected from *Life’s Little Ironies* are available for free at Project Gutenberg, [http://www.gutenberg.org](http://www.gutenberg.org). The poems read in class are also free at the website of The Poetry Foundation, [http://www.poetryfoundation.org](http://www.poetryfoundation.org). Course selections will be posted on docstore and emailed to registered students.
Kay Menchel, who grew up in Yorkshire, England, is a lawyer who also holds an MA in English literature from George Mason. She has taught numerous literature classes and always enjoys sharing her passion for English literature with OLLI members.

**F409 The Poldark World**

*Wednesdays, 11:50–1:15, Sept. 30–Nov. 11*

Seven sessions  
**Instructor:** Ellen Moody  
In this course we'll read Winston Graham's *Ross Poldark* and *Demelza*, the first two of the twelve novel series, and we'll watch and compare episodes from the first and second Poldark TV mini-series (1975-76, 2015). The first two Poldarks are brilliantly realized regional romances, excellently researched historical novels dramatizing later 18th century politically radical movements, medicine, mining, prisons, custom, law, and smuggling. Written in the aftermath of World War II, the books mirror issues of concern to that war-torn world, and the 1970s, and 2015 films adapt them to speak to issues of these times. We will treat the novels and films as historical fiction, creating usable pasts across 70 years. Suggested editions: *Ross Poldark, Demelza*. NY: Sourcebooks, 2009/2010, or London & NY: PanMacmillan, 2008.  
Ellen Moody holds a PhD in English from the Graduate Center, CUNY, and has taught college literature classes for over 40 years. Her specialties include the 18th century, Trollope, Victorian, and film studies. Her book is on Trollope, but she also has published many articles and delivered papers the literature of the 18th through 19th century, and on historical fiction, as well as Winston Graham’s Poldark novels.

**F410 Shakespeare Out Loud**

*Thursdays, 11:50–1:15, Sept. 24–Nov. 12*

**Instructor:** Wendy Campbell  
**Class limit:** 25  
This course is designed for those who dislike Shakespeare, don’t understand him, or don’t see what the fuss is all about. It is also for those who love the Bard, and want to share interpretive readings, and discuss his works. In other words, everyone is welcome. The class will read selected passages from the Bard’s plays and discuss what is happening, what the speakers might mean by what they say, how the lines reveal their characters, as well as what may be beautiful or interesting in the language. We will take a little time to look at the way actors we may know and love have approached the music of Shakespeare's works, and look for puns and bawdy jokes—the man was a master. No advance reading is required.  
Wendy Campbell graduated from Marymount University with a MEd. She taught in the gifted program in Fairfax County public schools for 20 years and was responsible for producing a Shakespeare play every year with actors who were 10 to 12 years old. She fell in love with Shakespeare at the age of 13.

**F411 The Movies of Robin Williams**

*Thursdays, 1:45–3:45, Sept. 24–Nov. 12*

**Note time**

**Instructors:** Michelle Blandburg, Martha Powers  
Few actors can match the legacy that Robin Williams left when he died last year at age 63. In addition to a successful career as a stand-up comedian and TV star, he was a remarkable movie actor whose unstoppable talent shone through in every role - however hilarious or serious it might be. This course begins with an introduction to Robin Williams, including his appearance on *Inside the Actors Studio*, followed by seven of his greatest movies: *Good Will Hunting*, *Good Morning Vietnam*, *Awakenings*, *Mrs. Doubtfire*, *Dead Poets Society*, *The World According to Garp*, and *The Birdcage*.  
Michelle Blandburg and Martha Powers both joined OLLI in 2013, and they have been active in the OLLI Players, Readers’ Theater, and other OLLI acting endeavors. They discovered a mutual admiration for Robin Williams and decided to bring his movies to other OLLI members who would enjoy them.

**F412 From the Page to the Stage: The Crucible**

*Saturdays, 2:00–4:00, Sept. 12, 19, Oct. 3, 17*

**George Mason University Music/Theater Building Room 2013**

**Coordinator:** Florence Adler  
**Class limit:** 20  
What goes into creating a theatrical production? *This course* will offer a behind the scenes look at the making of a play! Using Arthur Miller’s *The Crucible*, students will get first hand experience by exploring and witnessing the playwright’s inspiration, the way designers create the theatrical space, and how actors rehearse *The Crucible*. The play will be presented by the School of Theater and the Mason Players. *The Crucible* is a play based on a tightly-knit community with personal grievances that give way to superstition and madness. Miller’s timeless parable is vividly brought to life in this newly conceived production.
OLLI students can attend one or all four rehearsal weekends prior to opening, on Saturdays from 2:00-4:00.

- **Sept. 12**: Read through and designer presentation.
- **Sept. 19**: Rehearsal and stage blocking directions.

The Performance runs in Harris Theatre on Oct. 22, 23, 24, 29, 30, 31 at 8:00 and on Oct 31 and Nov. 1 at 2:00.

A post performance discussion will be held on Saturday, Oct. 31 after the 2:00 matinee. See Special Event 985.

Course instructors for this class will be the directors, **Professor Howard Vincent Kurtz**, theater faculty, and **Maggie Rodgers**, senior performance major from the School of Theater at Mason.

### R413 Northanger Abbey: Jane Austen’s First and Last Novel

**Mondays, 9:40–11:05, Oct. 19–Nov. 9**

**Four sessions**

**Instructor:** Beth Lambert

Jane Austen’s *Northanger Abbey* has the distinction of being the first novel she wrote and the last one published. Nor is that all: written and revised, named and renamed, sold and resold, *Northanger Abbey*’s composition history is unique among Austen’s novels. Then again, so is its protagonist, Catherine Moreland, whom “no one would have supposed to be born a heroine.” Moreover, Austen’s voice is unmistakable in the novel’s handling of the sometimes-volatile social, literary, and political worlds of the 1790s. Much matter here for discussion, and that is what we will do as we discover the ways Austen’s unique talents are manifested in her first novel. *Northanger Abbey* is available on e-books; the recommended printed text is Barnes and Noble’s edition of the novel.

### R414 Gone With the Wind: An Iconic American Novel

**Mondays, 11:50–1:15, Sept. 21–Oct. 26**

**Six sessions**

**Instructor:** Linda Blair

Almost everyone has something to say about Margaret Mitchell’s novel. Published in 1936 and made into a film in 1939, both forms of the Civil War era epic tell the story of, not only the war and its aftermath, but also of the four main characters: Scarlett O’Hara, Rhett Butler, Melanie Hamilton, and Ashley Wilkes. This course aims to explore fact and fiction surrounding the war and its aftermath, gender issues, and the novel’s place in American literary history. The format will be a combination of watching and discussing the film, then comparing significant aspects of the film to the novel.

**Linda Blair**, a retired Fairfax County high school English teacher, English Department Chair, and International Baccalaureate Diploma Program Coordinator, earned her doctorate in American Literature at The George Washington University.

### R415 Shakespeare’s Master Magician

**Tuesdays, 11:50–1:15, Sept. 22–Oct. 13**

**Four sessions**

**Instructor:** Kathryn Russell

In Shakespeare’s *The Tempest* we explore a world of enchantment created by the great magician Prospero, who wields his powers on fantastical creatures and humankind alike. His magic allows him to manipulate his island world, causing it to gravitate between chaos and restoration. The characters move haltingly toward a more desirable social order, if not the “brave new world” of imagination. Audiences over the centuries have enjoyed this romantic comedy, not only for its fantastical elements, but also for the playwright’s lively interest in human nature and exploration of real-life issues—justice and mercy, jealousy and love, destruction and renovation. The play also reflects Shakespeare’s real world with its focus on exploration and colonization. We will study the play through close reading of passages, class discussion, and scenes from several excellent videos. We’ll use the Folger Shakespeare Library paperback edition in class, though any copy of the play will suffice.

**Kathryn Russell** is an OLLI member and co-chair of the Program Committee. She taught high school English in Fairfax County for 21 years. An avid Shakespeare fan, she has taught many of the Bard’s plays at OLLI, as well as many other literature courses.

### R416 Literary Roundtable

**Wednesdays, 11:50–1:15, Sept. 23–Nov. 11**

**Reston’s Used Book Shop at Lake Anne**

**Moderators:** Janice Dewire, Carol Henderson

**Class limit:** 21

This continuing short-story discussion class will begin a new anthology: *The Scribner Anthology of Contemporary Short Fiction*, 2nd edition, edited by Lex Williford and Michael Martone. It’s important that registrants obtain the revised and updated second
edition, published in 2007, and available as a Touchstone Books paperback for $16.00 or less. The original 1999 edition (used by this class some years ago) contains almost completely different works. The fifty stories in the 2007 second edition were all published by American authors after 1970. Authors to be discussed this term include Russell Banks, Richard Bausch, Amy Bloom, and Junot Diaz. 

Janice Dewire and Carol Henderson are enthusiastic Literary Roundtable participants and former OLLI Board members who, some years ago, took on the moderator role for this popular course. It is one of the longest running in Reston.

R417 A Novel for All Seasons: Hemingway’s *The Old Man and the Sea*

**Thursdays, 11:50–1:15, Sept. 24–Nov. 12**
**Instructor: Donna Macurdy**

*The Old Man and the Sea* is considered to be Hemingway’s finest novel. Written in direct response to Hemingway’s critics, the old man in the novel becomes, for readers, a reflection of Hemingway himself. Published in 1952 in *Life* magazine, the story sold over five million copies in 48 hours. Released in hardcover, the story remained on the best sellers list for six months. Join us on the journey to catch the ‘one’ that almost got away. Sailing the waters off the Cuban coast with the old man, you decide if Hemingway achieves his goal: “to succeed when others believed he would fail.” Lecture, as well as small group discussion, will be a part of each class. In order to capture the mood of the journey, we will also be viewing Spencer Tracey’s highly acclaimed portrayal of the old man in the 1958 movie.

**Donna Macurdy** is a retired Fairfax County high school English teacher. She has a MEd in Curriculum and Instruction from George Mason University as well as a BA in English and Speech Communications from the University of Denver. Donna has taught a number of literature classes at OLLI, most recently *To Kill a Mockingbird*.

R418 Middlemarch

**Thursdays, 2:15–3:40, Sept. 24–Nov. 12**
**Instructor: Kay Menchel**

This class will tackle one of the greats of Victorian literature, George Eliot’s *Middlemarch*, a novel that allows us to immerse ourselves in the life of a provincial English town. The complexity and richness of the novel comes from Eliot’s depiction of her characters who do not exist to be admired or disparaged, but rather to be understood. To read about them is to realize that they possess lives as real and morally complex as our own. Perhaps this is why Virginia Woolf called *Middlemarch* “one of the few English novels for grown-up people.”

See F408 for instructor information.

L419 The New Yorker Round Table

**Mondays, 2:15–3:40, Sept. 21–Nov. 9**

The class is highly interactive. Discussion usually goes beyond the articles themselves to include personal knowledge or experiences class members had in relation to the topic.

L421 Shakespeare's *The Taming of the Shrew*

**Tuesdays, 9:40–11:05, Oct. 20–Nov. 10**
**Four sessions**
**Instructor: Richard Wilan**

Perhaps you will remember the musical *Kiss Me Kate*. In this play we meet the original Kate. Also you may remember the Elizabeth Taylor and Richard Burton film. Since the advent of recent feminist criticism, the play has generated a lively debate. Is Kate really “tamed” by Petruchio? (Brush up your falconry.) Or is Petruchio actually tamed by Kate? Or are they simply teamed? Why does the framework story, begun at the start, not come back at the end? Join our lecture discussion.
Richard Wilan received a PhD from the University of Maryland, where his dissertation was on Shakespeare’s *Troilus and Cressida*. He recently retired from Northern Virginia Community College where he taught writing and Shakespearean literature.

Along with the delights of the Italian and English countryside, we will encounter memorable characters, comedy, tragedy, and opera. F601  Judaism, Jews and Jewishness: The Origins and Evolution of Varieties of Jewish Practice, Belief, and Identity
Mondays, 11:50–1:15, Oct. 5–Nov. 9
Six sessions
Instructor: Gilah Goldsmith
For more than 2000 years, the Jewish people have lived in many places, embedded in the surrounding cultures and yet distinguishable from them. The result has been such a wide range of beliefs and practices that contemporary scholars talk about “Jewish cultures” in the plural. At the same time, these cultures are uniquely linked by shared history and sacred writings. This course will attempt to describe the historical processes and shared texts that have led to the various “flavors” of Jews and Judaisms over time and in the world today.
- Varieties of Jewish practice, belief, and identity today.
F602 The Gospel According to Paul the Apostle
Tuesdays, 9:40–11:05, Sept. 22–Nov. 10
Instructor: Steven C. Goldman
Of the 27 books of the New Testament, 13 are letters that claim to be written by Paul the Apostle. Furthermore, the Book of Acts devotes significant attention to Paul’s conversion to Christianity (after being one of its major opponents), his missionary activities, and his theological teachings. This course will focus on the major doctrines that Paul taught and how they are understood and implemented, in often very different ways, in the various manifestations of Christianity. The course will also compare and contrast Paul’s message with the teachings attributed to Jesus in the four canonical Gospels and with the doctrines set forth by other writers of the New Testament. Specific issues to be addressed will include: salvation; relations with and the status of Jews who do not accept Paul’s understanding of the Gospel; lawsuits among Christians; marriage, divorce and family relations; homosexuality; the role of women in the church; slavery; the “Lord’s Supper” and how it is to be observed; the “Second Coming” of Christ; and the Resurrection.

Steven C. Goldman is a member of the OLLI Board of Directors and serves as chair of OLLI’s Religious Studies Program Planning Group. He has taught numerous courses on alternative understandings of Biblical doctrine.

F603 How Jesus Became God
Tuesday, 11:50–1:15, Sept. 22–Oct. 13
Instructor: Jack Dalby
New Testament scholar Bart Ehrman states: “At the heart of the Christian faith is a spectacular claim: Jesus of Nazareth was, and is, God. But this is not what the original disciples believed during Jesus’ lifetime, and it is not what Jesus claimed about himself.” How is it that, within 100 years of his death, Jesus, an itinerant Jewish preacher, went from being seen as God’s unique messenger to God himself? In this course, we will examine how a small group of ancient, monotheistic Jews came to allow for their one God to have a “son.” We will examine the belief in divine humans in ancient Judaism; the ministry, death and resurrection of Jesus; worship practices of early Christians; Christology in the New Testament; and later Christology from the second and third centuries. Having a copy of How Jesus Became God by Bart Ehrman and access to a copy of the New Testament would be helpful, but not required.

Jack Dalby, president of White Oak Communications, is an OLLI member who has taught classes on the historical Jesus, St. Paul, and the first Christians. He holds a BS in communication arts from James Madison University and has taken graduate classes in history at George Mason.

F604 “A Big Heart Open to God”: a Seminar on Pope Francis
Tuesdays, 11:50–1:15, Oct. 20–Nov. 10
Four sessions
Fairfax Lord of Life
Coordinator: Greg Cleva
Pope Francis is the first Jesuit Pope and the first Pope from Latin America. He has aroused interest because of his embrace of a simple life, and his remarkable candor on a broad range of issues.

The first session will introduce Jorge Mario Bergoglio, Archbishop of Buenos Aires, Argentina, the first Pope to be called Francis after the iconic servant of the poor, Francis of Assisi. His biographer, Austen Ivereigh refers to him as “the Great Reformer” and a “Gospel radical.” We will explore the meaning of these characterizations and the influences that have shaped Francis, the man and priest.

The second session will discuss in detail Pope Francis’ pivotal work The Joy of the Gospel Evangelii Gaudium, and how this conveys the essence of Francis’ call to a “missionary conversion” of the Catholic Church.

The third session will discuss Pope Francis’s formation as a Jesuit, as well as his views on leadership and leadership style.

The fourth session will discuss Pope Francis’ encyclical on the environment, his views on women and their role in the Church, his writings on the world’s economic systems and income inequality, and his place in the history of the Catholic Church.

Seminar leaders include: Fr. Innocent Rugaragu, S.J., a Jesuit priest from Rwanda. He has lived and worked in other parts of Africa, particularly Tanzania. He is currently finishing his
doctoral work in the area of conflict resolution
peacekeeping at George Mason. 

Sandy Cleva received her BA and MA with distinction from the University of Virginia. She is currently a member of the Ignatian Volunteer Corps and is assigned to the Arlington County Office of Defender Aid. Fred Pugarelli is a graduate of Columbia University and New York University. Before retiring he was the business manager and director of a large Catholic parish in the Arlington Diocese. He previously lectured at OLLI on Celtic spirituality. Greg Cleva has a PhD in International Politics from The Catholic University of America. He is a retired foreign affairs analyst with the Department of Defense.

F605 From God To The Afterlife in Judaism, Christianity, and Islam

Wednesdays, 11:50–1:15, Sept. 23–Nov. 11
Instructor: John Rybicki

Concepts of God’s attributes and characteristics are important in the development of beliefs about the afterlife in Judaism, Christianity, and Islam. Several concepts are instrumental in afterlife beliefs, such as the understanding of the development of Divine justice and mercy, compassion and punishment, and the way God balances and prioritizes these. In these sessions, we will review the development of concepts of God in each of the three traditions in order to better understand the ideas of reward and punishment in afterlife beliefs. Based on belief in the afterlife, is the God of Judaism, Christianity, and Islam the same God? John Rybicki has been an OLLI contributor for over twenty years. He has diplomas in Theological Studies from both the Virginia Theological Seminary and the Antiochian Orthodox Church. He has studied at St. George’s College in Jerusalem and has received a Master of Theology degree from the St. John of Damascus Institute of Theology, Balamand University. John recently retired after ten years as a Pastoral Associate at the Riderwood Retirement Community in Maryland with responsibility for religious education, where he facilitated a weekly Jewish-Christian religious dialogue.

R606 Into the Light: An Introduction to the Fourth Gospel

Mondays, 11:50–1:15, Sept. 21–Nov. 9
Instructor: Pete Gustin

For good reason, the Gospel according to John, the fourth Gospel, stands well outside of the so-called synoptic Gospels of Matthew, Mark, and Luke. Purported to be authored by the Beloved Disciple, the fourth Gospel is the product of a community unlike any other in the primitive apostolic Church. This 8-week class will explore the authorship and purposes of the Gospel, as well as the environment in which it was produced and read. The exploration will focus on four major areas: What was the author trying to convey? How was the author’s message developed and possibly altered by later editors and redactors? What hermeneutic ought we try and apply to the text to help us understand it more fully? And most importantly, what does the text say to us, individually and corporately, in our present circumstances? Dr. Pete Gustin received his BA (English/philosophy) from Coppin State College, Baltimore, with a concurrent AB in theology from St. Mary's Seminary College, Baltimore. He received his MDiv from Virginia Theological Seminary and his DMin from Seabury-Western Theological Seminary.

L607 Three Existentialist Theologians: Martin Buber, Gabriel Marcel, and Paul Tillich

Three sessions
Instructor: Greg Cleva

The revival of religious studies in our times is best exemplified in the thought of three theologians: Martin Buber, Gabriel Marcel, and Paul Tillich. Representing different faiths—Buber (Judaism), Marcel (Catholicism), and Tillich (Protestantism)—their works are precursors of the post-modern era that takes us beyond the reliance on science into the realm of our own existential searching and personal experiences. The first class will provide an overview of existentialist philosophy, particularly as outlined in the works of William Barrett (Irrational Man and What is Existentialism) and how this thought is applied to the study of Theology. The second class will discuss the life and work of the great Jewish theologian/philosopher Martin Buber. Buber, a man of the Hasidic tradition, is best known for his pioneering work, I and Thou, which continues to be a classic in today’s world. The third class will discuss the life and work of Gabriel Marcel, a Frenchmen, a Catholic, and a contemporary of Sartre and Camus. He defines the outlook of the “Christian existentialist.” The fourth class will focus on Paul Tillich. Tillich’s The Courage to Be calls us “to accept our acceptance,” and to grow into the person we are called to become. See F604 for instructor information.
L608 Survey of Non-Traditional Beliefs
Tuesdays, 11:50–1:15, Sept. 22–Oct. 27
Six sessions
Instructor: Linda Bender
During the class we will explore such non-traditional concepts as karma, reincarnation, the chakras, mystics and the mystical sects, non-medical healing systems like Reiki or therapeutic touch, the implications of free will choice and being responsible for the results of our choices, the alchemist's physical elements (air, earth, water, etc.), and the layers of energy in the body. Our focus will be on understanding the concepts and implications of the various topics, using examples and discussion questions, including how to recognize them in actual day-to-day situations. We will talk about how facets of these beliefs might be used as effective tools or how to adapt them to your daily activities should you be interested in doing so. There will be time for questions so be sure to bring them to each session. There will be handouts for each class and a list of resources relating to the various topics.
Linda Bender spent 20 years as an Army Intelligence Officer’s wife and another 30 years managing billing offices for hospital and physician practices. She has continued her interest in and learning of non-traditional beliefs. She has also taught meditation systems for OLLI. Please see http://olligmu.org/profiles/index-profiles.html for more information about her background and experience.

L609 New Testament Tensions
Thursdays, 11:50–1:15, Sept. 24–Nov. 12
Instructor: Steven C. Goldman
The 27 books of the New Testament are the principal sacred texts of Christianity. However, there are substantial differences of opinion regarding the meaning of major doctrines taught within these compositions. Even those who accept the verbal inspiration and inerrancy of the texts do not always agree on the interpretation of specific teachings. We will examine a number of these tensions in this course including:
• **Is God a Trinity?**
• **Salvation:** What does it mean? How is it obtained? Can it be lost? Is it only for Christians?
• **Death:** Is it unconscious soul-sleep or a transition to immediate rewards or punishments?
• **Predestination and Free Will:** The New Testament teaches both. Can these doctrines be reconciled?
• **Baptism:** Is it a rite of initiation? Required for salvation? What about baptism of the dead?

• **Hebrew Scripture Laws:** Which are still binding on Christians? Do the obligations differ for Jewish Christians and Gentile Christians? See F602 for instructor information.

**F652 Religions and Traditions in the Middle East**

Mondays, 2:15–3:40, Sept. 21–Nov. 9  
Instructor: Johnnie C. Hicks  
Long before the discovery of oil in the Middle East, the region already had its greatest export, one that has arguably had the greatest impact in shaping human history. That export is one of “words.” Words served to create Western civilization and later formed stories describing man’s relationship to God. Words spoken directly to Zoroaster, Abraham, Moses, Jesus, Muhammad, and others compelled them to believe and follow the teachings of “One True God.” Words were later collected and written down and became the basis for five great Western religions and the countless variations among them. Along with an overview of today’s Middle Eastern Jews, Christians, and Muslims, we will look at the religious traditions of Alawites, Alevis, Baha’is, Druzes, Mandaeans, Samaritans, Yazidis, and Zoroastrians. The focus of this course is not on theological concepts per se, but rather on the diversity of religious groups and the traditions that identify their beliefs and cultures. In this way, we hope to better understand the current conflicts and possible implications for their social and political outcomes. Just as ancient “words” have shaped our own Western beliefs and religious traditions, they continue to live on in the rich diversity of religious traditions in the Middle East.  
Johnnie Hicks, a professional educator and counselor, carries a lifelong passion for learning about world cultures and religions. She has twice lived in Iran where she taught at the Teheran American School and visited neighboring countries. Johnnie has retired from Fairfax County Public Schools and taught several courses on multicultural topics for George Mason University.

**F653 Metaphysics: Reflections on the Nature of Reality**

Tuesdays, 11:50–1:15, Sept. 22–Nov. 10  
Instructor: Irmgard Scherer  
Metaphysics studies reality at its most fundamental level and examines how the mind can take hold of it. This course studies some of the greatest metaphysicians in the history of ideas who tried to grasp "Being-as-such," not only physical-sensible reality, but also non-physical or supersensible entities that are not accessible to the senses. We will start with the fragments of the “Pre-Socratics” in ancient Greece who famously asked: what is the source of all things? We will then study various philosophers through the ages: Democritus, Plato and Aristotle, Aquinas and Anselm. Their theories were superceded when the illusory nature of the senses came under scrutiny. Early modern thinkers ushered in new views of reality: Descartes, Locke, Berkeley, and Kant. As certainty about what is real becomes ever more elusive, boundaries between realism and anti-realism are blurred and modern thinking considers whether it is even possible to study science without recourse to metaphysics.  
Irmgard Scherer, a US citizen born in Germany, is emeritus professor of philosophy at Loyola University Maryland, where she taught core courses, honors ethics courses, courses in the history of ideas and science, as well as topics in her specialty--Kant and 18th century aesthetic theory. Since retiring she has taught OLLI courses, such as Ancient Greek Roots of Modern Science, Philosophical Aesthetics, Intro to Kant among others.
Ms. Lihong Wang found in Chinese vernacular architectural motifs. Participants will learn how paper cutting is integrated into many traditional Chinese customs and can even be reflected in works created, both past and present. The second lecture will highlight the historical significance and geographical distribution of bamboo-growing regions in China and its influence on the symbolic significance of bamboo in traditional Chinese culture. The third lecture will present the historical context of the Chinese zodiac system and a discussion of the twelve animal signs. The final lecture will discuss the origins of Chinese paper cut folk arts and the cultural significance reflected in works created, both past and present. Participants will learn how paper cutting is integrated into many traditional Chinese customs and can even be found in Chinese vernacular architectural motifs. Ms. Lihong Wang is an Associate Professor at Beijing Language and Culture University (BLCU). In January 2011 she came to the US to serve as resident director of the Confucius Institute at George Mason University. She has her MA in linguistics from Jilin University in China and her PhD in intercultural communication and foreign language education from Durham University in the UK. Ms. Xiao He is an Associate Professor at Beijing Language and Culture University (BLCU). The philosophies of Jeremy Bentham, Immanuel Kant, John Locke, John Stuart Mill, Robert Nozick, and John Rawls are explained and used to reason through these dilemmas. The course is available at http://www.justiceharvard.org/, where you can find more information about Michael Sandel and this course. L657 Family History Workshop

Mondays, 9:40–11:50, Sept. 21–Nov. 9
Instructor: Ray Beery
Many of us take delight in remembering our forebears through genealogy research. In this workshop, we will
share what we have done, from beginner to sophisticated researcher and recorder. While the emphasis on research will be the Internet, there will be old-fashioned library activities and the completion of forms integral to serious family history.

Ray Beery is a long time OLLI teacher. He has been collecting and building his family tree for some 30 years. His immigrant ancestors include Nicholas Bieri, a Swiss Mennonite who arrived in Lancaster County in 1727 and was one of the original Pennsylvania Dutch. Another was Thomas Farmer, who received a Jamestown plantation in 1625.

L658 The Nuremberg Trials
Tuesdays, 11:50–1:15, Sept. 22–Nov. 10
Instructor: Steve Greenhouse
The Nuremberg Trials were the first international war crimes trial in history. This course traces the history of the laws of war; the organization of the Nuremberg Tribunal; and discusses the prosecutors, judges, defense counsel, and the defendants (including psychiatric evaluations of some of them). The course will also cover the indictments, verdicts, and sentences. Finally, we will discuss in detail the substantial and far-reaching legacy of Nuremberg. The trials were the world’s way of confronting unspeakable evil perpetrated by a civilized nation in modern times. One historian described them as “legalism’s greatest moment of glory,” but legal absolutists have characterized them as invalid, partly because of their use of ex post facto law. Despite the criticism, the trials gave the leaders of a defeated nation the benefit of the rule of law and due process with the presumption of innocence, something they denied their millions of victims.

Steve Greenhouse received his PhD in Electrical Engineering from Catholic University and recently retired after working in the space communications field for the last 35 years of his career. Steve has long held an acute interest in the Nuremberg Trials and the crimes which precipitated them, the perpetrators, and their motivations.

L659 Infectious Diseases, People, and Geography
Thursdays, 9:40–11:05, Sept. 24–Nov. 12
Instructor: Barbara Crain
In the 1860s over 100,000 Egyptian laborers died of cholera while working on the creation of the Suez Canal. Yellow fever and malaria sent roughly 85% of the Panama Canal workforce into hospital at least once in the initial two years of canal building (1904-1906). As of May 2015, Ebola claimed 11,020 deaths mostly in three West African countries. Where did all these diseases come from? Why were they present in these particular areas? Why does an outbreak become an epidemic or even a pandemic? Medical geography is concerned with the study of the spatial distribution of disease. It incorporates geographic techniques, and it looks at the impact of climate and location on health. This exciting course will provide an overview of selected infectious diseases, their past and present spatial distribution, and their causes. Expect some light reading, some lectures, small group work, and in-class discussions.

Barbara Crain holds an MA in geography from the University of Heidelberg, Germany, and an MS in environmental science from Johns Hopkins University. She is an Associate Professor at NOVA.

L706  Korea: North and South
Thursdays, 11:50–1:15, Oct. 8–Oct. 15
Two sessions
Instructor: Greg Scarlatoiu
● Oct. 8: “The North Korean Conundrum.” This session will address the history, current state, and future prospects of the North Korean human rights situation. How does the repressive Kim regime maintain the status quo? What are the US and international communities doing to effect change? Scarlatoiu will also address the factors that contribute to the longevity of the Kim regime, as well as the forces that are eroding the Kim family’s grip on power.
● Oct. 15: The Han River Miracle: South Korea’s Past, Present, and Future. The second session will address the economic, social, and political evolution undergone by South Korea since its establishment in 1948. Scarlatoiu will discuss South Korea’s astounding economic development, also known as “The Han River Miracle.” There is a “darker side” to that miracle; it is the price South Koreans had to pay to accomplish this unprecedented success story. Finally he will also describe the current political outlook of South Korea, as well as political security, trade, and investment issues pertaining to the US-South Korea alliance.

Greg Scarlatoiu has an MA in Law and Diplomacy (MALD) from the Fletcher School, Tufts University, and an MA and BA from Seoul National University, Department of International Relations. Currently he is Executive Director of the Committee for Human Rights in North Korea (HRNK) in Washington, D.C., tasked with researching and reporting, as well as conducting educational and outreach programs.

800  Science, Technology, and Health

F801  Science and Technology Today
Four sessions
Fairfax Lord of Life
Coordinator: John Acton
● Sept. 22: Dr. Theodore C. Dumas, Assistant Professor, Krasnow Institute for Advanced Studies at George Mason. The neurobiology of learning and memory is a vast area of research, producing numerous detailed theories about how neural networks encode and store memories. Two opposing notions suggest either that memory storage may rely primarily on physical rewiring of the network or could result from a functional state subserved by ongoing metabolism. We have initiated studies to address this issue in the cryptobiotic tardigrade, known as the “water bear.” Results from this study will help refine models of memory storage in humans and contribute to understanding of neural tissue preservation.
● Sept. 29: Dr. Iosif Vaisman, Associate Director, School of Systems Biology at George Mason. “Building Bridges Between Genomics and Clinical Decision-making.” Quantitative data from genomic analysis can be used to build clinically relevant models capable of facilitating diagnostics and treatment as well as providing insights into the pathology of the disease. Such approaches rely on gene expression and mutation data from large cohorts of patients and utilizes machine learning algorithms to identify patterns that link an individual patient’s genomic profile with their clinical outcome. These patterns are used to construct predictive models which can inform decisions about treatment modalities.
● Oct. 6: Dr. Kim ‘Avrama’ Blackwell, Professor, Krasnow Institute of Advanced Studies at George Mason. “What do Parkinson’s Disease, Addiction and Habit Learning Have in Common?” The answer is dopamine, which is a molecule produced by the brain in response to reward. Drug abuse strongly activates dopamine production, and thus addiction represents a very strong habit. In contrast, Parkinson’s disease is caused by a lack of dopamine. Dr. Blackwell will present research describing how learning causes changes in the brain cell connections and how the changes in the brain cell connections caused by dopamine depletion can cause the abnormal brain activity in Parkinson’s Disease.
● Oct. 13: Dr. Robert Cressman, Assistant Professor, Krasnow Institute for Advanced Studies at George Mason: “Energy and Neuronal Function.” He will discuss the metabolic demands of neuronal function and, in particular, pathologies like epilepsy, migraines, and ischemia, and give a general overview of the state of our understanding of neuronal function, how it depends on a constant supply of energy, and the metabolic and transport processes that provide the energy for the brain.
Oct. 8: Dr. Jonathan Mobley specializes in urology with subspecialties in general urology and minimally invasive surgery. He will speak on “Prostate Cancer: the Evaluation and Treatment Options of Prostate Cancer.”

Oct. 15: Dr. Chris Silveri, board certified in orthopedic surgery, will speak on the “Spine: Chronic Back Pain and other Spine Related Issues.”

F804 History of Medicine: From Witchcraft to Robots
Thursdays, 11:50–1:15, Oct. 22–Nov. 12
Four sessions

We will highlight some of themes and key milestones in the story of medicine and discuss the development of ideas about the causes of disease from the Greco-Roman humoral theory up to the discoveries of germs and genes in the modern era.

Part II: The spring 2016 term will cover the rise of modern medicine and medical advances by a timeline. In addition, we will describe the ways wars affected medicine and the men and women who made medicine what it is today.

Rita E. Way studied at the Sacred Heart Hospital School of Nursing. She worked as a Medical-Surgical Nurse for twelve years, after which she joined a long term care company that owned and managed both skilled and assisted living nursing homes. Nursing and medicine have always been her passion.

R806 Our Human Origins and Evolution
Four sessions
Instructor: Keith B. Ward
Questions about human origins fascinate us. We will consider how concepts of evolutionary theory and evidence uncovered by paleo-anthropologists cast light on our origins. After discussing various ways that evolution works, we will consider how, starting with a species living in Africa about 6 million years ago, our ancestors gradually developed more and more of the characteristics we consider “human.” We will also discuss issues such as: Why are we the only “human” species left on the earth? Has human evolution stopped? What can analysis of our DNA tell us about where our ancestors lived during the last 10,000 years?
Keith Ward, PhD in Biophysics, Johns Hopkins University, was a chemistry professor at the University of Wisconsin before serving the Departments of the Navy, Homeland Security, and Justice during his career with the Federal Government. He received the Presidential Rank Award of Meritorious Senior Professional and was recently inducted into the Academy of Distinguished Former Students by Texas A&M University. Since retiring as Senior Science Advisor to the Head of the FBI Laboratory, Keith has indulged his avocational interests in human evolution. He is a docent in the Hall of Human Origins at the Smithsonian Museum of Natural History.

Tallwood
Coordinator: Florence Adler with Kathleen Curtis
This lecture will explore the fascinating social structure, intense cooperation, and organization within honey bee colonies. A special focus will be on the health challenges which are accountable for killing an increasingly high number of native bees and in managed bee colonies each year. We will examine the effects that the lack of bees have on the beekeeping and pollination industries worldwide as farmers adjust to the shortage to provide the food we want at a cost we can afford.
German Perilla, originally from Bogota, Colombia, earned his BS in Biology from University of Maryland and an MS in Sustainable Development from George Mason University. While in Colombia, he worked on pollination projects using Africanized bees, taught apiculture and business skills to refugees, and pioneered the management of the Varroa Mite parasite. At the invitation of the Israeli government, he travelled the country advising on beekeeping as a profitable enterprise. Currently, Professor Perilla serves as the Director of the Honey Bee Initiative at George Mason teaching a number of courses, including an integrative field studies course conducted in the Peruvian Amazon fostering beekeeping as a community-driven development tool in other South American countries.

During his 48 years as FBI Director, J. Edgar Hoover developed the nation’s premier law enforcement agency, staffed by highly qualified agents with access to the best available technology. The FBI was at the forefront of law enforcement, from depression-era bank robberies to Nazi and communist espionage. Through a sophisticated public relations and press program, Hoover succeeded in creating a highly favorable public image of the FBI as the agency that “always gets its man.” At the same time, some of Hoover’s programs employed illegal activities, including wiretapping, burglaries, harassment, and violations of the civil liberties of individuals and organizations of which he disapproved. Hoover’s FBI also developed investigatory files on individuals who were not suspected of illegal activities. The files were used to intimidate politicians and journalists who might be opposed to the FBI. Hoover’s FBI was used by certain

960 Japan-A Safe Haven for Jews in World War Two
Two sessions
Rose Gallery at Reston Community Center Lake Anne
Instructor: Ben Gold
Shortly prior to and during World War II, tens of thousands of Jewish refugees were resettled in the Japanese Empire. But wasn’t Japan an ally of Nazi Germany? Didn’t Hitler want the Japanese to round up their Jewish population? Why did the Japanese refuse? And why was Chiune Sugihara, a Japanese diplomat who served as Vice-Consul for the empire of Japan in Lithuania, officially recognized by Israel and given the honor of being named “Righteous Among Nations”.

963 Is Your Money Still Safe?
Monday, 11:50–1:15, Oct. 12
Loudoun
Instructor: Robert Oshinsky
During the 1920s and early 1930s, thousands of banks in America failed. As a result, millions of Americans lost their life savings, and the Great Depression began. As a response, the Federal Deposit Insurance Corporation was created in 1933. The purpose of the FDIC is simple: insure the deposits in banks so customers’ money will be safe. The 1980s brought the Savings and Loan Crisis, and 2007 brought the Subprime Crisis. During these crises, over 2,100 institutions failed, but not one cent of insured deposits were lost. How does the FDIC work? How does the FDIC maintain an insurance fund to prepare for bank failures? Plan to attend this event if you would like to learn about the FDIC and get the answer to the question: “Is my money still safe?”.
Robert C. Oshinsky holds a BA in Mathematics and Economics from Connecticut College, an MBA in Finance and Investments from The George Washington University, and a MS in Finance from The George Washington University. He is Senior Financial Analyst at the FDIC. Mr. Oshinsky has 24 years of experience as a bank regulator, working at the Resolution Trust Corporation, the Federal Reserve Board, and the Federal Deposit Insurance Corporation. Since 2007, he has been responsible for the Risk Related Premium System.

965  Gilbert and Sullivan Operettas-Part I
Wednesday, 2:15–3:40, Oct. 14
Rose Gallery at Reston Community Center, Lake Anne
Instructor: James W. Keefe
The century and a quarter that has passed since W. S. Gilbert and Arthur Sullivan first captured the appreciation of London, New York, and the whole English-speaking world has hardly diminished their fame. Their partnership ended in the 1890s but their successful works stand, with Oscar Wilde’s plays, as the most durable theatrical compositions of the period. G&S collaborated on 13 or 15 works, depending on whom you ask, with 9 of them very successful. In this presentation we will concentrate on their earlier successes such as H. M. S. Pinafore and The Pirates of Penzance, leaving their later big hits like The Mikado to G&S Part II in the spring.
Dr. James W. Keefe is a former choral music teacher, high school principal, university professor of education, and a national educational association director of research. He received his PhD in educational curriculum and research from the University of Southern California. In 1995 he retired from the National Association of Secondary Principals. He has conducted high school and college choruses, as well as church and boys’ choirs, and is currently a member of the Reston Chorale, in which he sings tenor and arranges some of the music for the group.

968  An Extraordinary Young Man: The Early Years of George Washington
Wednesday, 2:15–3:40, Oct. 21
Fairfax Lord of Life
Coordinator: Velma Berkey
Relatively little is known about George Washington's youth, and it has led to many myths and misrepresentations about him. Professor Henriques will closely examine what we do know about George Washington's first 21 years. While no one could have imagined the unique role that he was to play in our nation's founding, Professor Henriques demonstrates
that Washington was no ordinary young man.

**Dr. Peter Henriques** received his PhD in history from the University of Virginia and is Professor of History Emeritus at George Mason. He is the author of *Realistic Visionary: A Portrait of George Washington*. As a recipient of the George Washington Memorial Award from the George Washington Masonic Memorial Association in 2012, Dr. Henriques presented the Distinguished Lecture Series at Colonial Williamsburg. His latest endeavor is a work in progress, *America's Atlas: The Leadership of George Washington*.

### 969 Fibonacci: Great Mathematician of the Middle Ages

**Wednesday, 2:15–3:40, Oct. 21**

**Rose Gallery at Reston Community Center, Lake Anne**

**Instructor: Michael Flicker**

Leonardo Pisano (Fibonacci) was the most important European mathematician of the middle ages and the world’s greatest number theorist from the time of Diophantus (250 CE) to Fermat (1600 CE). He was the link with Europe between the mathematics of the Greeks and Arabs. In this class we will discuss his main works: *The Book of Calculation* in which Hindu-Arabic numbers are introduced to the European mercantile class, *Practical Geometry*, and the *Book of Squares*, which is Fibonacci’s most creative work. In 1225 Fibonacci was invited by the Emperor of the Holy Roman Empire to court in Pisa where he was challenged by the court mathematician to solve three problems, which we will discuss.

**Michael Flicker**, an OLLI member who holds a PhD in physics, has been interested in the history of mathematics since his high school days.

### 970 The Rise (Again) of Charismatic Catholicism and Protestantism in Latin America

**Friday, 1:00–2:30, Oct. 23**

**Tallwood**

**Instructor: Garry Sparks**

Despite various efforts to import Protestant Christianity into Latin America since the early colonial period, the growth of “evangelical” Christian populations did not have any significant impact until the 1960s. Specifically, this growth pertained to charismatic Protestantism when, ironically, historical mainline Protestantism was at its height in the US and was critically reconsidering its history in Latin America. Scholars have proposed various theories to explain this shift and growth. These range from the covert support in US foreign policy of right-wing Protestantism in the region, local reaction to left-wing or Marxist liberation theology, and similarities between Pentecostalism’s doctrine of the Spirit with indigenous “spirituality.” However, the understudied growth of charismatic Catholicism that occurred with the emergence of both liberation theologies and evangelism in Latin America provokes a rethinking of a style of Christian worship. That style now cuts across traditional denominational boundaries, the new political activism of indigenous peoples, and the rise of charismatic Catholicism in the US It is due, in part, to its importation, not from the north to the south, but vice versa with late migration.

**Garry Sparks** earned a PhD in Theology and Religious Studies from the University of Chicago. He is an Assistant Professor in Mason’s Religious Studies Department. His research and teaching interests focus on an anthropological (socio-cultural and linguistic) and ethnohistorical understandings of theological production in the Americas, particularly among indigenous peoples.

### 972 An Afternoon [Wasted] with Tom Lehrer

**Monday, 11:50–1:15, Oct. 26**

**Loudoun**

**Instructor: Marianne Metz**

Harvard mathematics professor by day, wicked song satirist by night—that was Tom Lehrer in the 1950s. Lehrer paired lilting melodies with darkly humorous lyrics. Irreverent to the nth degree, he liked to quote reviews such as "Mr. Lehrer’s muse is not fettered by such inhibiting factors as taste." (New York Times, 1958). Our class session will range from "Fight Fiercely, Harvard" (1953) to "Silent E" (a song Lehrer wrote for
the PBS children's show "The Electric Company" in the 1970s). Along the way we'll hear such fan favorites as "The Masochism Tango," "The Vatican Rag," "When You Are Old and Gray," "We Will All Go Together When We Go," and, of course, "Poisoning Pigeons in the Park." We'll view a full-length concert that Lehrer performed in Oslo in 1967. Prepare to be delighted!

Marianne Metz, is a long-time fan of Tom Lehrer. She also enjoys classical musicals (as does Tom Lehrer) and has shared her enthusiasm in OLLI classes on Gene Kelly, Fred Astaire, and American songwriters.

976 Hello, Alice Faye, Hello!
Friday, 1:30–3:30, Nov. 6
Note time
Tallwood
Moderator: Marianne Metz
Born in New York in 1915, Alice Faye was brought to Hollywood by an early employer who mentored and championed her: Rudy Vallee. She was still a teenager. By the time she was 20, Alice had attracted legions of fans with her good looks and warm, sultry singing voice. She could make any song sound appealing. And when some of our best songwriters began writing for Faye, she delivered their creations with such warmth, clarity, expressiveness, and overall musical intelligence that listeners never forgot them. Between 1934 and 1945 Alice Faye was the musical queen of Twentieth Century Fox (sometimes co-starring with the studio's musical princess, Shirley Temple). Alice starred in about 30 Fox films before she walked away from it all at age 30. But she still has millions of fans. Now, in her centennial year, we offer a chance to see and hear why so many adore Alice. Come watch Hello, Frisco, Hello, made during World War II, in which Alice unforgettably introduced the song "You'll Never Know." The film also stars John Payne and Jack Oakie, but it's Alice Faye who will enchant you!

Marianne Metz, your moderator for this film screening, is co-chair of OLLI's Art/Music Program Planning Group and is one of Alice Faye’s many admirers.

977 The B-29: The Plane That Ended World War II
Monday, 11:50–1:15, Nov. 9
Loudoun
Instructor: Eric Forman
On August 6 and 9, 1945, the United States dropped atomic bombs on Japan. Six days later, Japan agreed to surrender, and World War II was brought to an end. While much has been written and said about the two bombs, comparatively little attention has been devoted to the remarkable aircraft that carried them: the B-29 Superfortress. The technology that enabled the B-29 to carry exceptionally heavy bomb loads far greater distances than any other bombers of the era made it the most complex, sophisticated, and expensive aircraft of the Second World War. This lecture will explore the design, manufacturing, and operational challenges of the B-29, with particular emphasis on the atomic bomb missions.

Eric Forman holds a PhD in International Studies from Johns Hopkins University. He is a docent at the Smithsonian Institution’s National Air and Space Museum Udvar-Hazy Center.

Coordinator: Florence Adler
The Crucible, a play written in 1953 by Arthur Miller, is directed by Howard Vincent Kurtz, Professor of theater and Maggie Rodgers, a senior performance major from the School of Theater at Mason. The play is a dramatized and partially fictionalized story of the Salem witch trials that took place in the Province of Massachusetts Bay during 1692 and 1693. 1005BT A History of Shame, and Why It Matters
Friday, 1:00–2:30, Sept. 18
Tallwood
Instructor: Peter Stearns
American shame has a distinct history. The emotion was widely used and accepted in colonial times, then declined rapidly in acceptability in the 19th century. The US is contrasted with other societies where shame has lasted longer. But what is particularly interesting is a recent revival of shame, and lots of controversy about whether the emotion is useful or not. An emotion's history doesn't sort out all the problems, but it helps, and can stimulate intelligent discussion.
Peter N. Stearns is Provost Emeritus of George Mason. He has written or edited 120 books and published widely in modern social history, including Doing Emotions History. Forthcoming works include: Guiding the American University: Contemporary Problems and Prospects. He is currently completing A History of Shame for University of Illinois Press.

The 1964 release Robin and the Seven Hoods is an updated Robin Hood story set in Prohibition-era Chicago. It's a stylish musical in which Frank Sinatra, Dean Martin, and Sammy Davis, Jr., all shine. They are joined in song by Bing Crosby (who was brought in to replace Peter Lawford after a Sinatra/Lawford falling-out). Peter Falk and Barbara Rush also star, and Edward G. Robinson makes a cameo appearance. We will see Robin and the Seven Hoods in its entirety. What a way to go!

Rose Gallery at Reston Community Center Lake Anne
Coordinator: Beth Lambert
What better way to conclude a Board of Directors meeting in Reston than with a Chili Cook Off? We know there are as many varieties of chili as there are innovative cooks, and this is a perfect opportunity to share the riches. We will also need corn bread, so the
less-aspiring cooks among us will be able to make a contribution. (Practical matter: there will be plugs available at the Rose Gallery for those bringing crock pots.) Come, catch up on the latest Board of Directors news, and enjoy the culinary talents of your (fellow) OLLI cooks. Registration is on a first come, first served basis. SIGN UP SHEETS WILL BE AVAILABLE AT ALL 3 CAMPUSES.

Liaisons can help make our classes the best they can be, and they also offer our non-OLLI member presenters a warm welcome and a helping hand. Please join us for a participative discussion about how to be a great liaison—and we’ll provide free pizza to guarantee your time is well spent! Registration is on a first come, first served basis.

We try to identify common interests so that members can plan to travel together; in addition, we organize occasional local trips where we carpool to sites within a driving distance of 60 to 90 minutes. These local trips include visits to historic homes and museums.

Coordinator: Ute Christoph-Hill  utehill@cox.net
When OLLI is in session, the Walking Group meets one morning a week, generally an hour before the first morning class. We gather in the Fairfax Pool parking lot next to Tallwood and walk for about 45 minutes, arriving back at Tallwood in time for the start of classes. All levels of walking ability and speed are accommodated—our goal is camaraderie as well as exercise. We set the day of the week for our walks during the first week of the term, based on which day is most convenient for the majority of participants. Between terms we continue to walk on a weekly basis, but for longer distances and at more varied locations. Contact Ute Christoph-Hill for more information.

Registration and Membership
Policies and Procedures

Registration

- Members may register for fall 2015 courses and events at any time during registration, **August 17 to August 26**. Registrations received during this time period are considered **on-time** and receive equal consideration.
- You may join OLLI, renew membership, and/or sign up for courses and events online at [olli.gmu.edu](http://olli.gmu.edu). (Click on Register/Member Portal.) Credit card payment is required for any fees when registering online. Payment by check is preferred when registering with a form.
- Alternatively, the registration form on page 44 may be used to register, join, or renew your membership. Return the form with your payment (check or credit card information) to OLLI by mail or in person. **Faxed registrations will not be accepted.**
- If you register anytime after **August 26**, you may still be accepted into the classes you select, but only if space is available after on-time registrations have been processed.

Enrollment and Waitlisting

When you register, list the courses and events you want in the order of their importance to you. Members are placed in courses and events based on the priority number they assign to their requests. If class enrollment reaches capacity (a number set by the instructor or based on room size), those who have designated that course as priority one will get in first, then the priority twos and so on. In addition, a random number is assigned by our computer system to each registration request. At the point that all members of a priority group cannot be included in the course, those with the lower random numbers will be admitted into the course first.

Making Changes

After August 26, you may request courses or special events for the fall term online or by filling in a Change of Schedule Request (available in the office at Tallwood and during the term at the Reston and Loudoun locations). If a course or event is filled, you will be waitlisted. Dropping a course can only be done using a Change of Schedule Request. A list of courses and events with open seats will be posted at all sites and on the OLLI website.

If you are unable to attend a course or event in which you are enrolled, **please drop the course/event**. If there is a waitlist, the next member on it will be called, based on their priority and random number.

Confirmation and Class Payments

- About one week before term begins, you will receive confirmation email showing enrollment status for your requests and any changes to classes including locations. If you do not have an email on file, it will be mailed to you.
- For courses/events with a fee, a separate notification will be sent. If you have been placed on the preliminary roster, **you must pay within a week of notification to complete enrollment**. If not, your seat will be offered to a member on the waiting list. If you will be out of town and unable to pay during that time, submit to the Tallwood office a separate check for each course/event with a fee, so we can process payment. Checks for courses/events for which you are waitlisted will be shredded.
- **OLLI CANNOT** guarantee a refund for courses/special events once you have paid and are enrolled. Consider carefully before signing up for courses with fees.

Membership Fees and Charges

- **Full membership** annual dues are $375. This allows you to register for unlimited courses and activities held at all three locations for four terms (fall 2015, winter 2016, spring 2016, and summer 2016).
- **Introductory fee** for prospective members is $150. Introductory members may register for unlimited courses and activities at all three locations during the fall 2015 term. Introductory members will not be issued a George Mason ID card. This introductory fee offer is not available to former OLLI members.
- If the renewal date on the catalog mailing label is 9/1/15 or earlier, please pay your annual dues. If the date is 1/1/16 or later, you are a continuing member and do not need to pay your dues now. For current members, the Member Portal states your membership renewal date.

- **Membership payment options:** 1) Pay in full by check or credit card at the time of registration, OR 2) pay in 12 equal monthly installments by credit or debit card. **Your application for the installment plan must be approved each year before you can register for courses or activities. Your financial support helps OLLI accomplish our equipment and recognition goals. It is hoped that you will continue to make tax-deductible contributions to Friends of OLLI.
