The Impact of Gender Imbalance on Marriage Markets
Marriage Markets: Previous Work

- Gary Becker
  - Equal number of men and women
  - Costless search
  - Perfect information
  - Marriage revolved around specialization and division of labor
  - All men and women married

- Lots of work built on this
- Why do some remain single?
- What if the number of men and women are not the same?
Recent Changes in Marriage

- Technological changes
- Declining fertility rates
- Greater economic opportunity for women
- Acceptability of cohabitation
- Birth control
- Changes in family law*
Differences or Similarities?

Division of Labor

Joint Consumption
More Singles Than Ever Before

Percent Married by Age, 1880–2000

(Graph from: Stevenson, Betsy and Wolfers, Justin. 2007. “Marriage and Divorce: Changes and their Driving Forces.” Journal of Economic Perspectives, 21: 27-52.)
Trends in Marriage and Divorce

Marriages and Divorces per Thousand People, United States 1860–2005

(Graph from: Stevenson, Betsy and Wolfers, Justin. 2007. “Marriage and Divorce: Changes and their Driving Forces.” Journal of Economic Perspectives, 21: 27-52.)
Sex Ratio

\[ \text{Sex Ratio} = \frac{\sum \text{Males}}{\sum \text{Females}} \]

- Those seeking mates
- How common is it to have imbalanced populations?
- What are examples?
- What impact does this have?
College Campuses

- By 2015 average graduating class expected to be 60% female
- Competition for male attention?
- James Madison University = the wave of the future?
- Basic supply and demand
Evolutionary Psychology in a Nutshell

I HAVE AN ACTUAL JOB AND I DON'T LIVE AT HOME.

MY OFFSPRING WOULD PROBABLY BE SMART.

MY PALMS ARE GETTING SWEATY AND MY HEART IS POUNDING. WHAT IS GOING ON?

IT'S A DARWINIAN THING.

MAKE IT STOP!

YOU'RE NOT MY TYPE. WHY AM I ATTRACTED TO YOU? HOW DID YOU DO THIS, YOU MONSTER!

IN TROUBLING ECONOMIC TIMES, MY FINANCIAL STABILITY APPEALS TO YOUR SURVIVAL INSTINCTS. IT'S BASIC EVOLUTION.

GAAA!! THAT MADE ME BORED AND AROUSED AT THE SAME TIME!

SCIENCE!
Education Differences

- Evolutionary psychologists tell us women generally prefer men of higher status than themselves
  - Financial
  - Educational
  - Industriousness
- True even for successful women
- Looming shortage of college educated men?

(From the American Council of Education report on Higher Education)
Washington DC

(Data via U.S. Census Bureau, 2000 Census; CNN; The Williams Institute)
Other Cities

Circles are sized to reflect how many more singles there are in each metro area, by gender

More men

More women

2,500 10,000 20,000 40,000

40,000 20,000 10,000 2,500

LA-Long Beach-Santa Ana: 89,459 more single men than women

Las Vegas

Minneapolis-St. Paul

Memphis

N.Y.-Northern N.J.: 210,820 more single women than men

New Orleans

Miami-Ft. Lauderdale

SOURCE: 2006 AMERICAN COMMUNITY SURVEY, U.S. CENSUS BUREAU

NOTE: ONLY INCLUDES SINGLES AGES 20-64
Shortage of Black Men

- 70 single black men for every 100 single black women
- 43% of black women have never married
  - Less likely to marry, stay married, and remarry
- **Black women are most unpartnered group in US -- possibly the world**
China: An Imbalanced Country

- Biggest demographic time bomb in the world
- Severe shortage of girls
- Selective abortions
- Preference for sons
- Sex ratio = 1.2
  - Some regions as high as 1.35+
- Black market for boys and brides
- Rising violence?
Japan: The Land of Disappearing Children?

- Declining fertility rates
- Fewer women willing to marry
  - Particularly among educated women
  - Economic independence of women
  - Marriage not attractive
  - Sex-ratio of married-minded?
- Also demographic time bomb?

(data source: http://www.stat.go.jp/en/data/handbook/c02cont.htm)
India: No Toilet? No Bride!

- Gender-specific abortions
  - Illegal, but happens quite often
  - De facto vs. de jure
- Sex-ratio at birth = 1.18
- In rural India, prospective brides insist on a toilet in the home
- Increasing sanitation
- Fewer females gives women greater bargaining power when it comes to arranging a marriage
Sub-Populations in the US

- Several subgroups in the US also exhibit strong son-preference
- Sex-ratio at birth
  - Chinese-American = 1.25
  - Indian-American = 1.18
  - Korean-American = 1.18
- Implies gender-specific abortions
- If the first two children were girls, the ratio for a third child was 1.51!
- Asian-American women most likely to marry interracially
  - Ticking time bomb for Asian-American men?
Need an Ultrasound? There’s an App for That!

- General Electric recently announced cell-phone sized sonograms
- Creates cheap, portable handset to help improve the health of mothers
- Potential for misuse
- Lowers cost of determining sex of child
- More difficult to detect illegal activity by authorities
- Impact on sex-ratios?
What About Religious Groups?

- Women tend to be more religious than men
- Shortage of devout men
- Sexual mores
- Within group marriage
- Low sex ratios among singles
Religious Group
Demographics

Bachelor Degree+, Ages 30-39
Attend Church Weekly

(Data via General Social Survey, 2000-2006)
Two Girls for Every Boy?

Is education a negative for religious women?

Anecdotal evidence consistent with this
- Mormons
- Muslims
- Evangelicals

\[ \text{Sex ratio} = \frac{(.167)(.259)}{(.244)(.361)} = .49 \]

Bachelor Degree+, Ages 30-39 Attend Church Weekly

(Data via General Social Survey, 2000-2006)
How’s That Compare?

Bachelor Degree+, Ages 30-39
General Population

(Data via General Social Survey, 2000-2006)
The General Population

In the general population, college-educated men outnumber college-educated women.

Amongst devout, college-educated women outnumber college-educated men 2 to 1.

(Data via General Social Survey, 2000-2006)
Religious Prohibitions: Effects?

1) Incentive to marry at earlier ages
2) Marry more cautiously
3) Higher search cost
4) Isolated groups
   - Gilligan effect?*
   - Adverse-selection?
5) Prohibitions as price controls?
   - Underground economy?
   - Preference falsification?
The Gilligan Effect

Why might “low-activity” singles groups persist?

Build-up of social capital?
- Reduces likelihood of leaving
- Familiarity of people?
  - Raises cost of relational risk-taking

RESULT: Trapped on a desert island!

Why is no one smiling?
Separation of Church and Date?

- Religious men more risk-averse
  - Cause or effect?
- Early marriage?
  - Lower reservation threshold
- Risk-averse dating?
  - Lower dating activity?
  - Longer search time?
- Overall effect
What About the Internet?

- May help isolated groups better connect
- Could reduce search costs
- Better matching?
  - Lower divorce?
- Paradox of Choice?
- Doesn’t impact sex ratios

“Twenty years from now, the idea that someone looking for love won’t look for it online will be silly, akin to skipping the card catalog to instead wander the stacks because ‘the right books are found only by accident’... serendipity is the hallmark of inefficient markets, and the marketplace of love, like it or not, is becoming more efficient.”

-- Rufus Griscom, Wired Magazine 2002
Research Agenda

- Religious data
  - Facebook surveys?
  - GSS data imprecise for smaller groups
  - ARDA
  - Field research
  - Other?

- Computer simulations
  - Agent-based models
  - Santa Fe Institute

- Theoretical models
- More empirical data
