

General

Each session will begin with the announcements on screen, followed by an initial slide from portrait.odp. The document Script.odt indicates in red where I want bullet and slide transitions; the annotations will either be the name of a slide from one of the .odt documents or will be “click” to indicate, e.g., the space bar, the N key. Each of the first two sessions will include a song; I will want the lyrics displayed while the song is playing.

Session 1 – Introduction

Prior to the session, please open

- Announcements
