WEEK III
MYTHOLOGY

• Science shares explanation with mythology. What distinguishes science from mythology is verification.

• A creation myth or cosmology myth offers an explanation that is to be believed. Acceptance, not verification, is what is called for.
Dia de la Raza

The Day of the Race
Myths of Humanity

• Humanity is very broad and can cover a range of topics.

• Our goal will be to look at the origins of humankind, origins of woman, myths of sexuality, food and farming, origins of fire, origins of misfortune and origins of death.

• We will tend to leave supernatural beings and spirit and the afterlife for a future lesson.
