**June 17 & 24, 10:00-11:30**  
*Tallwood*

Most Americans know little about Canada, the country that shares the long U.S. northern border and is our largest trading partner. Canadian geography presents a harsh environment for most of the country and limits development. Tensions and antagonisms exist among the Canadian provinces and the government in Ottawa. In 1995, the people of Quebec almost voted for independence. Additionally, British Columbia and the three provinces of Western Canada demand ever more powers from Ottawa. Instructor and LRI member Bill Ciccolo questions, "Will Quebec secede? Will the other Canadian provinces join the U.S.? What is the U.S. policy toward Canada and Quebec?" In two PowerPoint presentations, participants will become familiar with Canadian history and geography and the Canada of today.

12. U.S. on the World Scene: The First 50 Years June 4, 10:00-11:30
Tallwood
During the early years of its independence, the U.S. faced numerous foreign enemies in Europe and even in far-away Russia. Few of them expected or wanted the new republic to succeed. Most historians focus on how the U.S. survived domestically during its founding years. Little attention is paid to how it survived, and even advanced its own interests, in a hostile foreign climate. Michael Styles, who has taught other courses on American history at LRI, will take us through the first 50 years of U.S. foreign relations, showing that it was not until the post-WWII period that the U.S. again became as actively involved on the world scene as it was during these early years. This course will also be given on June 11 at the Lake Anne Church. (Same description as for Course 16).
